

New firmware and hardware features now available to end users of the SAM 935:

1. Temperature stabilized probes now shipping
2. New intuitive interface and easy reference utilities menu
3. Gross CPS data output for reporting needs
4. Neutron CPS data available in real time!

PLUS: *New hardcopy user manual designed for non-technical users now available.*

Contact Berkeley Nucleonics for assistance in choosing which upgrade option best fits your FY2006 budget:

Option A: Single firmware upgrade and temperature stabilized probe retrofit

Option B: Purchase a service agreement for your existing SAM 935:

Option B INCLUDES:

- Probe Retrofit
- Firmware Upgrades during Warranty Term
- Annual Calibration (for three years)
- Training Tuition (one person per annum)
